

## Double Sided Super 6 Screen

Thornliebank is a well-established suburban area located just a few miles south of Glasgow City Centre, characterised by a predominantly residential catchment and strong daily commuter movement. Our double-sided Super 6 digital screen is prominently elevated along the busy dual carriageway of Nitshill Road (A727), delivering outstanding visibility across multiple lanes of traffic. This strategically positioned route acts as a key arterial link for surrounding suburban towns and provides direct connectivity to the M77, resulting in consistently high traffic volumes throughout the day.
