

Mega 6 Double Sided Screen

Located on Arbroath Road (A92) one of the main arterial routes along Scotland's east coast. The double sided screen is positioned close to the roadside and slightly elevated, ensuring clear sightlines, with an optimal viewing height for passing motorists. Its placement allows it to effectively capture traffic travelling in both directions, maximising reach and campaign visibility. The surrounding area includes a small industrial estate, which contributes regular weekday traffic, as well as two large supermarkets nearby that generate steady local vehicle movements throughout the day.
